## ABOUT ME

Multiplatform Software Development student seeking a Data Architecture internship to apply knowledge in SQL, Python, and data modeling. Eager to contribute to the design and implementation of robust, scalable data solutions while advancing toward a career as a Data Architect.

## EXPERIENCE

### Saturday Project

2025

Volunteer at Adventist Solidarity Action

Application under development for managing data of volunteers and assisted families, automating registration, queries, and report generation for the social project. I am responsible for both frontend and backend development.
